

#3265

Long Roll Cutting by Hand?

The entry level **BROOKE CUT ONE** production cutters are for roll paper users with high quality standards, and lower volume demand.

Print cutting doesn't have to be a high labor cost for a lower volume business. The **Brooke Cut One** cutters are a cost effective way to get into the automation game.

CUT ONES cutting system will lower your costs of production and do away with awkward print roll handling. Load your roll of prints. Fast manual advance. Press a button or foot pedal to actuate. Cut prints and slugs simultaneously with the optional double cut blade assembly. **Cut One** cutters are made for roll-to-print cutting.

Two Models

Cut One-12 handles 2 3/4 inch thru 12 inch wide, and **Cut One-20** handles from 3 1/2 inch thru 20 inch wide. Maximum Capacity 575-foot paper rolls.

Already have a roll cutter? **Cut One** is a sensible backup cutter for overflow work, while automatic cutters are occupied.

Upgrade to Fully Automatic CUT ONE'S are upgradeable to fully automatic **BP-1200** (12-inch) and **BP-2000** (20-inch) high speed production cutters. You won't lose

your initial investment as your volume increases.

In fact, over half of previous purchasers have upgraded **Cut One's** to automatic cutters. If the **Cut One** looks similar to the **BP-1200**, it's for a good reason. Both are built on the same chassis as the **BP-**high speed automatic cutters.

CUT ONE SPECIFICATIONS
