

KODAK PROFESSIONAL LED II Printer 20R & 20P

Quality Has Been Accelerated.

No question this printer has quality. Sharp edge-to-edge pixel exposure gives you fine detail. And our enhanced LED technology exposes images faster than ever, delivering up to 200 8- x 10- inch prints per hour. Add marking for automated package cutting and additional paper sizes, and you have a digital printer that meets your quality needs and supports your production workflow.

Applications: High-quality digital portrait and commercial prints, school senior portraits, wedding and studio photography, enlargements, and large-format prints.

Host Support: KODAK PROFESSIONAL Imaging Software and other proprietary software including DICE CHEETAH-RIP, Vividata, DIGICOLOR RIP, HALSE Imaging Systems, and LUCHT Reprí.

KODAK PROFESSIONAL LED II Printer 20R & 20P

The speed you need with the quality you expect.

Key Features and Benefits

- Generates up to 200 8 x 10-in. prints per hour
- Enables prints up to 20 x 33 in.
- Supports automated package cutting via barcode technology
- Digitally prints image files (up to 120 MB) onto KODAK PROFESSIONAL Digital Paper, Type 2976
- Proprietary LED printhead uniformly exposes every pixel to produce exceptionally high-quality portrait and commercial prints with excellent sharpness and minimal flare
- Exceptional color reproduction
- Provides cut/order punch (roll-to-roll configuration only)
- New processor on 20P model provides better image uniformity and faster throughput
- ICC Color Profiles enable accurate and consistent color management
- Built-in copyright detection marking capability

Specifications

- Image file size: 5034 x 8248 pixels
- Productivity: Workflow system-dependent printer is capable of:
 - 20R: 200 8 x 10 in. pph on 20 in. paper
 - 20P: 184 8 x 10 in. pph on 20 in. paper
 - 20R: 171 8 x 10 in. pph on 10 in. paper
 - 20P: 154 8 x 10 in. pph on 10 in. paper
- Paper: Accommodates 10, 11, 11.69 (A4), 12, and 20 in. rolls up to 574 feet long
- Product configurations: Roll to roll (20R) or roll-fed with cut-sheet processed output via integral paper processor (20P)
- Print resolution: 250 ppi
- Maximum density: 2.3 red, 2.2 green, 2.1 blue (2.2 neutral D-max)
- Dimensions: W: 20P 106 in. (269.2 cm), 20R 74 in. (188 cm); D: 20P and 20R 41 in. (104.1 cm); H: 20P and 20R 52 in. (132 cm)
- Weight: 20R 1,075 lbs. (488 kg); 20P 1,425 lbs. (647 kg) without chemistry
- Electrical requirements:
 - Printer: 15A, 200/240V, 50/60 Hz;
 - Processor: 30A; 208/240V, 50/60 Hz
- Operating environment: 15 to 26°C (59 to 80°F), 15 to 76% relative humidity
- Regulatory approvals: UL/CSA/FCC Class B, TUV CE Mark

A world of support

We support you with a depth of resources that only a company the size of Kodak can provide.

We have a global network of dealers, people, parts, information, and communications, to assure your satisfaction with our products. And they are right at your doorstep.

If you need assistance in using or maintaining any Kodak product, call your local Kodak representative or authorized dealer of Kodak products in your country.
