

TAKE PICTURES. FURTHER.™

KODAK PROFESSIONAL RP 50 LED Printer

CONSISTENTLY STUNNING ENLARGEMENT PRINT QUALITY AT PRODUCTION SPEEDS.

The quality you demand and the speed you need—all in an LED printer that has proven itself in hundreds of professional laboratories worldwide.

Here are just some of the advantages you get when you combine the RP 50 LED Printer in a solution with other KODAK PROFESSIONAL Modular Digital Workflow Products:

Impressive productivity: Generate up to 180 8" x 10" (20.3 cm x 25.4 cm) prints per hour on 20" (50.8 cm) paper.

Exceptional print sharpness: Proprietary LED print head produces extremely sharp prints with minimal flare.

Consistently beautiful color: Employs Kodak's Color Management Technology for accurate color reproduction print after print.

Big print sizes: Can handle prints up to 20" x 33" (50.8 cm x 83.8 cm), so you can output more of your volume using one printer.

The RP 50 LED Printer can help increase overall productivity when combined with other KODAK PROFESSIONAL Modular Digital Workflow Products. From scanning and manipulation to printing, storage and beyond, flexible and scalable Modular Digital Workflow Products help you build a powerful, promising digital future.

Kodak Professional

TAKE PICTURES. FURTHER.™

A proven combination of speed and quality.

No matter what your application—commercial or portrait, large format or packages—the RP 50 LED Printer can help provide the productivity and print quality you need from a digital workflow.

An LCD readout and light touch controls make it easy to monitor every job.

Easy-loading cassettes accept five popular paper widths.

On-board processing delivers prints ready for final finishing.

SPECIFICATIONS

Components:

- Printer with a digital exposure system (LED)
- Paper processor with RA4 Chemistry System

Dimensions:

Width: 107" (272 cm)
 Depth: 40" (102 cm)
 Height: 52" (132 cm)

Printer:

- Exposure by a proprietary LED print head
- Internal drum mechanism
- Scanning width: up to 20" (50.8 cm)
- Resolution: 250 ppi

Print Speed:

- Up to 180 8" x 10" (20.3 cm x 25.4 cm) pph using 20" (50.8 cm) paper
- Up to 150 8" x 10" (20.3 cm x 25.4 cm) pph using 10" (25.4 cm) paper

Page Sizes:

- Minimum: 8" x 10" (20.3 cm x 25.4 cm)
- Maximum: 20" x 33" (50.8 cm x 83.8 cm)

Paper Transport:

- Cut-sheet transport on one lane, paper cut after exposure edge registered
- Paper cassette: Accommodates 10" (25.4 cm), 11" (27.9 cm), A4-11.69" (29.6 cm), 12" (30.5 cm) rolls up to 574' (175 m) long, and 20" (50.8 cm) rolls up to 288' (87.8 m) long

Paper Processor:

- Cut sheets are processed via an integral paper processor

Chemistry:

- KODAK EKTACOLOR RA4 Process
- Throughput: 25"/min. (63.5 cm/min.)

Interface:

- SCSI

Main Control:

- Embedded, real time operating system
- Designed to be easily integrated with Kodak Professional's DP2, Pro Series or Wedding Club software

Availability:

- Scheduled for Q4 2002
