

Konica Digital Minilab QD-21 System

# QD-21 PLUS

*A new horizon in imaging*

### Image Editing System

**Konica QD-STATION** further widens the range of services that can be offered to customers.

#### Supports writing of image data

Allows you to write data input via the scanner of the QD-21 Plus main unit to MO discs, floppy disks, etc. Using the CD-R writer supplied with the QD-STATION, you can also offer a service that writes input data to QD-ALBUM.

#### Rich array of software applications to increase customer satisfaction

The standard package of software applications includes not only Q-File, Q-Frame, and contact templates, but also caption, editing layout, ID photo, and package print templates.

\* Software may also be purchased separately.

\*\* Package design may differ from above photo.

### High-quality service for studios, design houses, and printing companies

#### Meeting the growing demand for new print services

- Improve your image with a beautiful new menu.
- Differentiate yourself from the competition with a handsomely finished presentation.
- Create marketing tools like posters and direct mail brochures.
- Make albums of commemorative snaps or studio photos.
- Keep a record of construction photos.

Freely add captions

Customers can edit their images themselves

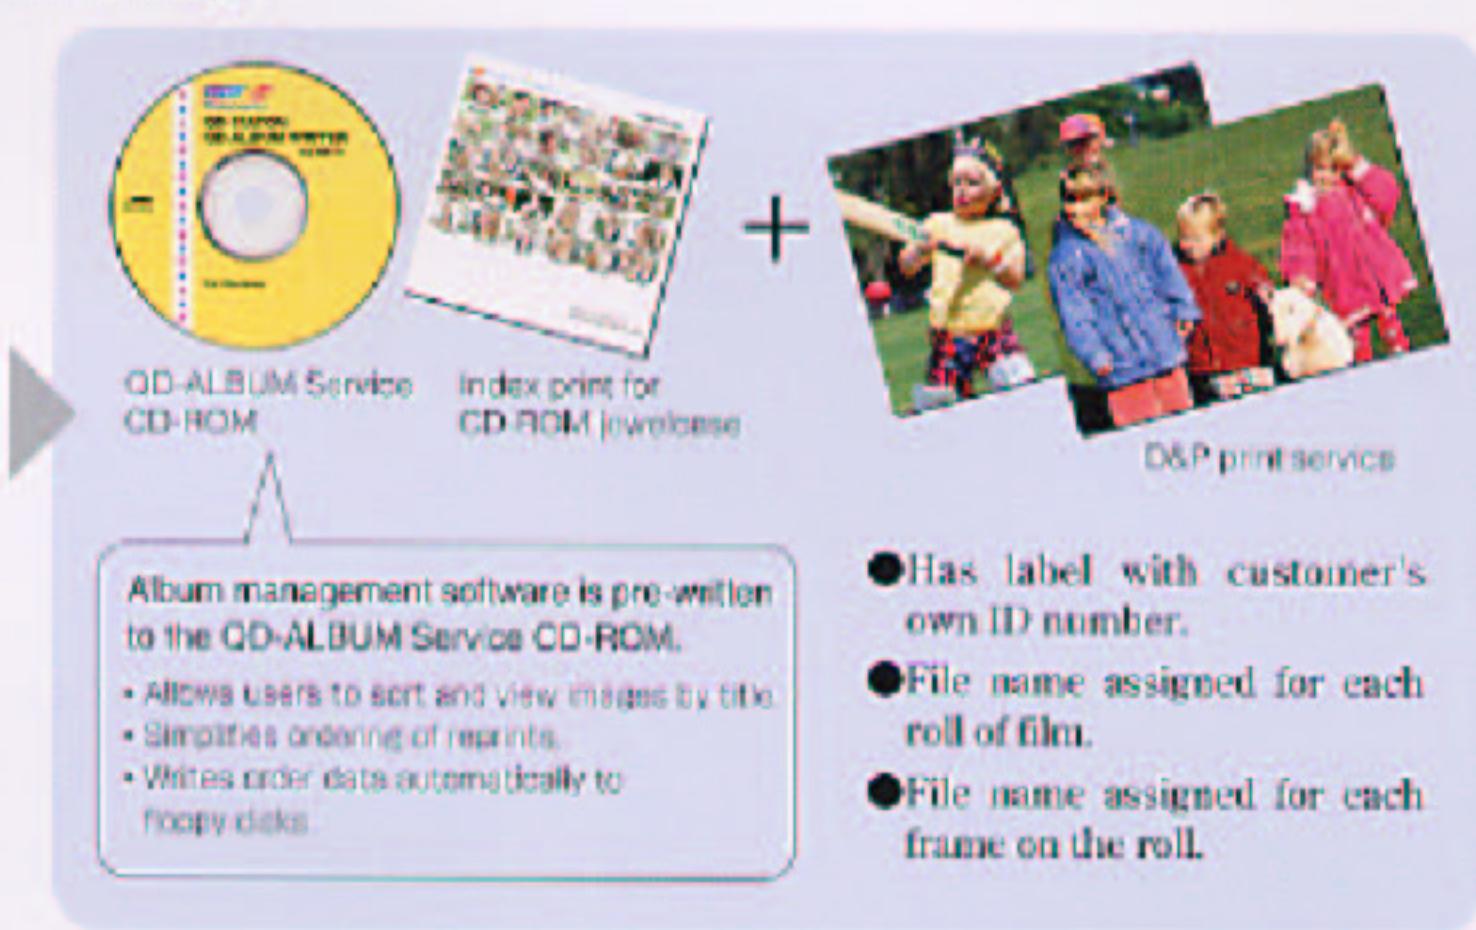

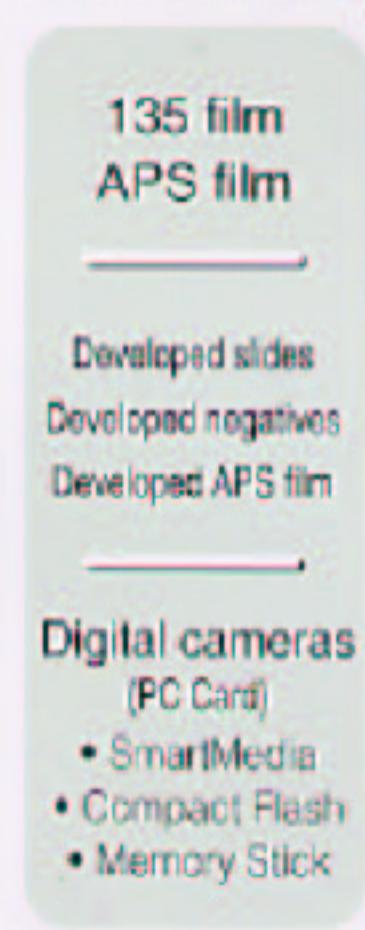

Rich selection of templates

### Making it easy to keep track of image data

## Konica QD-ALBUM delivered with D&P prints.

You can also write your customers' photos to CD-R discs.

\* Prints other than D&P prints can be accepted.

Easy to make prints (reprints) directly from the CD-R.

One CD-R disc holds about 1,000 images, facilitating image management.

Easy to view images from the disc on a home PC.

\* For further details, please refer to the QD-STATION catalog.

## QD-21 Plus Film Processor

# World's fastest film processor brings outstanding efficiency

Uses the world's fastest film process, ECOJET HQA-N (4 minutes 22 seconds). Enables outstanding working efficiency, so you never feel overburdened even on the busiest days.

### Standard order feeder accepts up to 6 rolls

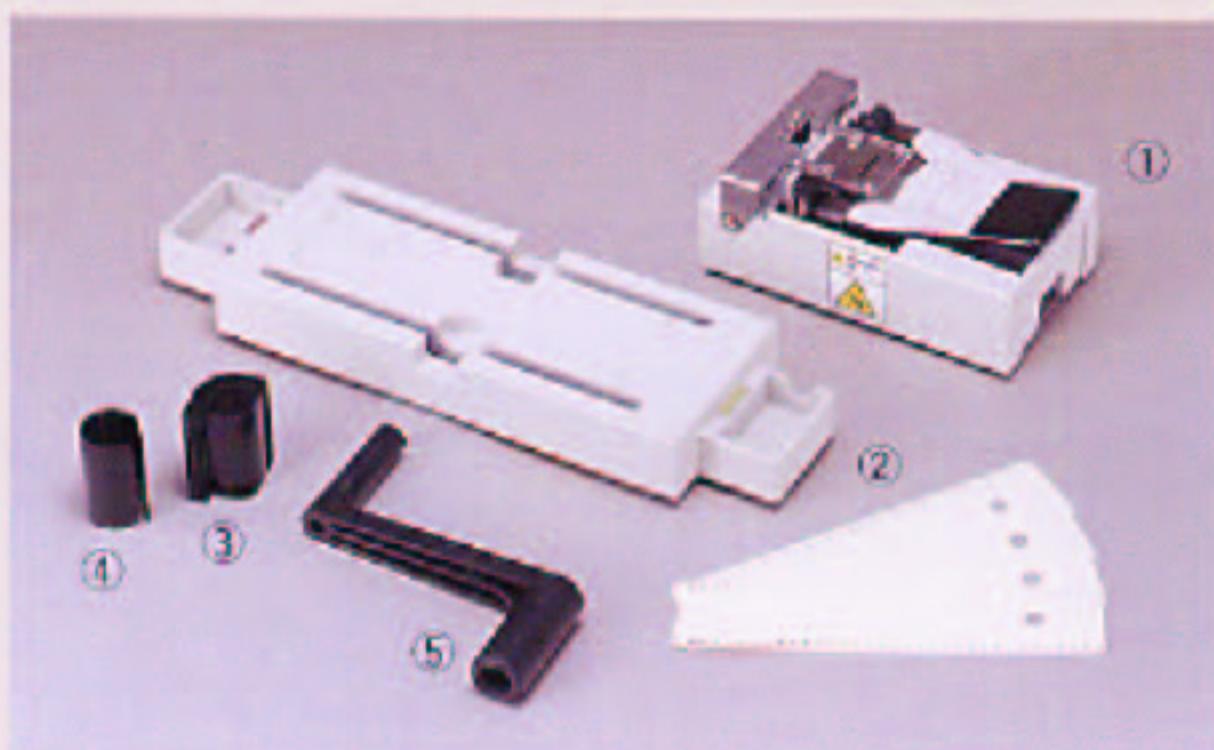

For 135 patrones, uses a leaderless method. Up to 6 rolls can be loaded, for greater working efficiency. Rush jobs can be given higher priority.

\* 135 film only, short leader is required for APS film.

\*\* When 6 rolls are loaded, 5 rolls are on standby while 1 roll is processed.

### Accessories

- ① Lead cutter
- ② Splice gauge,  
for attachment to short leader for APS film processing
- ③ APS magazine adapter
- ④ Minipatrone adapter
- ⑤ Manual handle for use in power outages

### QDF-32U/T Film Processor

#### ● Specifications

Model name	QDF-32U/U (standard) / T (CE standard & Others)
Dimensions	455 x 790 x 1180 (w/d/h)
Weight	Approx. 100 kg (excluding processing solution)
Electrical capacity	Single-phase 200V AC to 240V AC 2.4 kW

#### ● Film Processor module

Development method	135/APS dual transport 135 film: self-support transport (leaderless) APS film: short leader transport
Processing speed	Approx. 700mm(27.6")/min
Processing chemicals	Konica ECOJET HQA-N N1 to N4 (All-in-One cartridge)
Processing time	N1 to N4: 3 min. 30 sec. (Dry-to-dry 4 min. 22 sec.) [N1]: 100.0 sec. [N2]: 23.8 sec. [N3]: 47.6 sec. [N4]: 46.7 sec. [Dry]: 44.3 sec.
Processing rack method	Roller transport
Processing tank capacity	[N1]: Approx. 4L [N2]: Approx. 3L [N3]: Approx. 3L X 2 [N4]: Approx. 3L X 2
Water replenishment method	Separate replenishment by bellows pump Replenishment tank capacity: 10L
Overflow tanks	2 tanks (U standard) 1 tank (CE standard & others)
Auto feeder	Up to 6 rolls (1 processing, 5 standby)
Operating environment	Temperature: 10°C to 30°C Humidity: 30% to 80%
Cold weather adjustment	Automatic temperature adjustment when temperature falls below 20°C during timer operation

### Options

- ① Detacher
- ② Reattacher
- ③ F-R film reshaper
- ④ Cartridge tool
- ⑤ Film tip iron

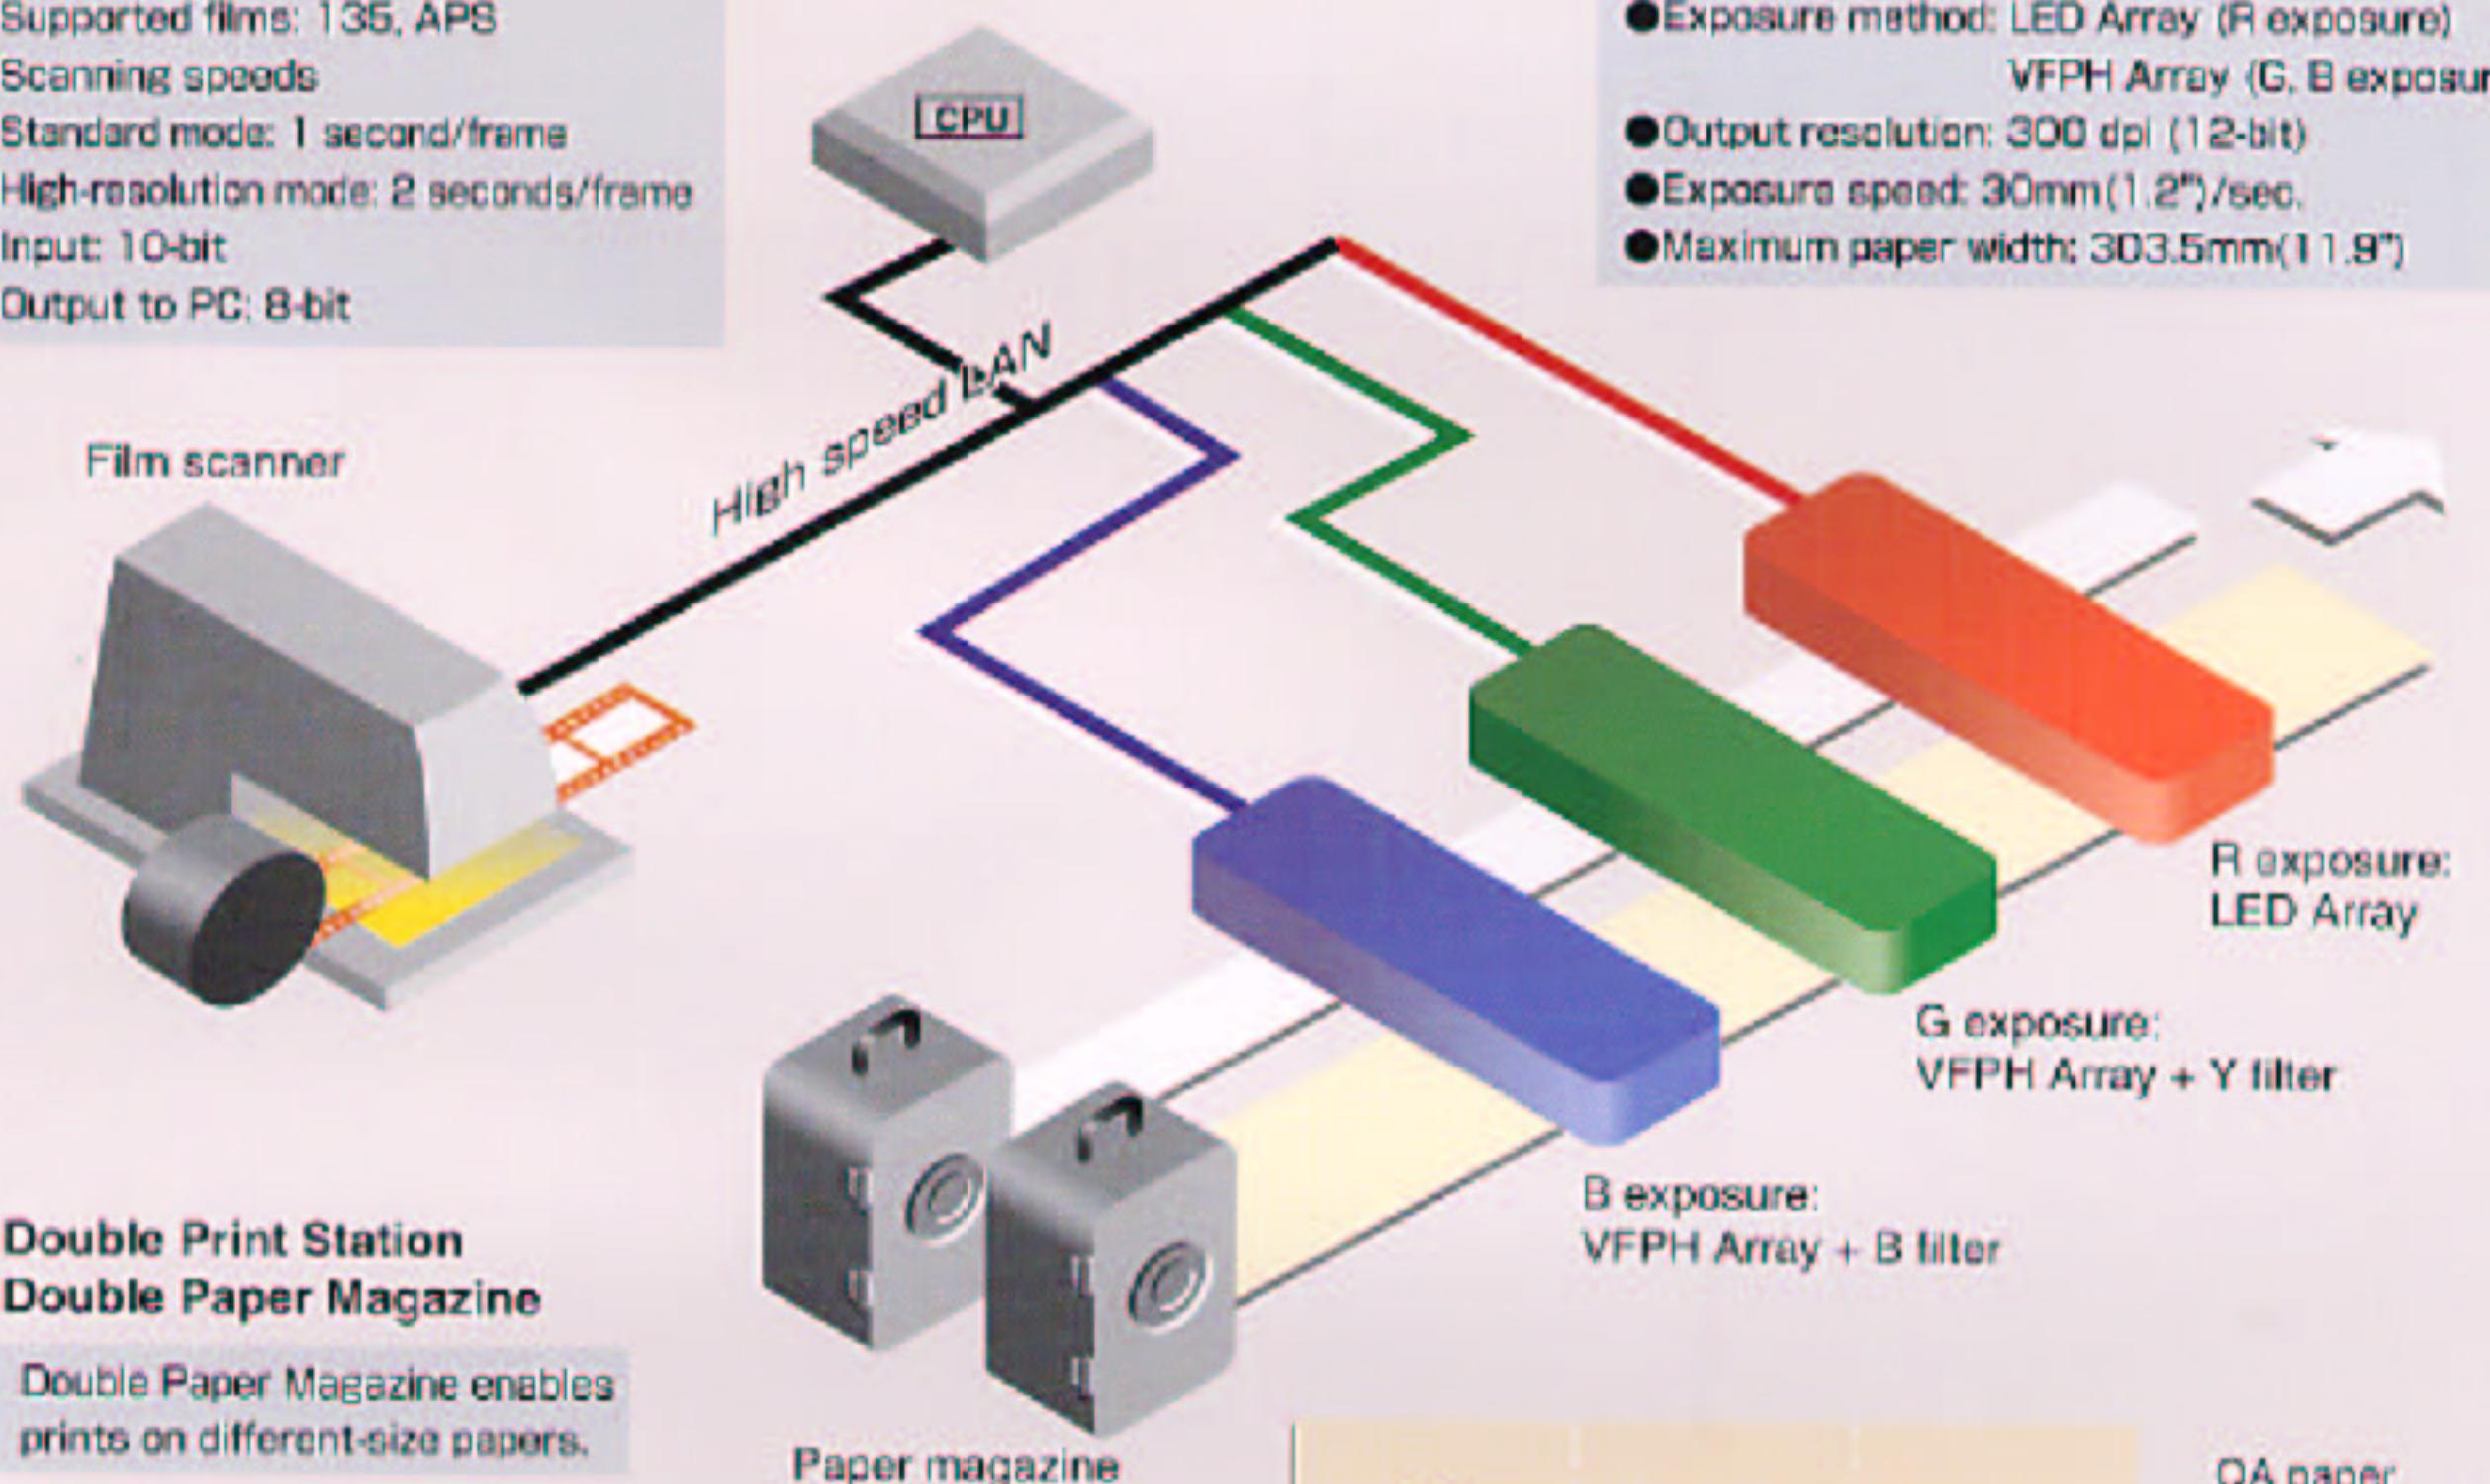

\* World's fastest as of January 2000

## High Speed Film Scanner and Full-Digital Exposure

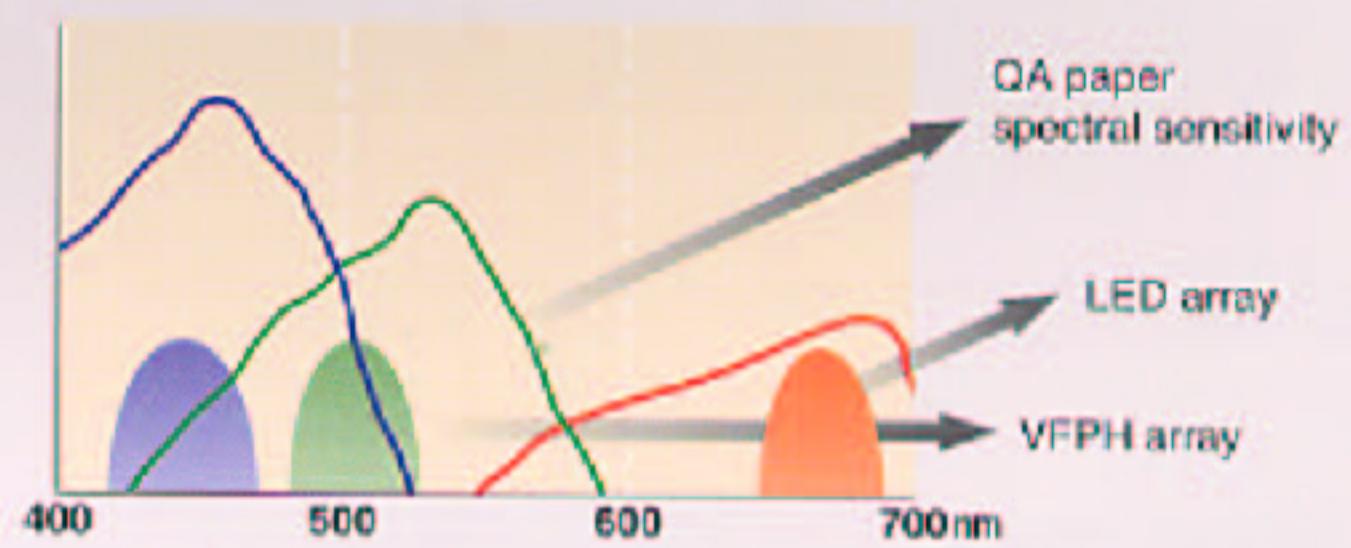

### High Speed Film Scanner

- Supported films: 135, APS
- Scanning speeds
  - Standard mode: 1 second/frame
  - High-resolution mode: 2 seconds/frame
- Input: 10-bit
- Output to PC: 8-bit

### High Speed Printing

- Exposure method: LED Array (R exposure)  
VFPH Array (G, B exposure)
- Output resolution: 300 dpi (12-bit)
- Exposure speed: 30mm(1.2")/sec.
- Maximum paper width: 303.5mm(11.9")

## Double Paper Transport System

The QD-21 Plus features a double paper magazine that allows paper of the same width of 127mm(5") or less to be loaded in two magazines at the same time. This system was developed by Konica to enable high-speed processing.

\* Paper with widths of 152mm(6") or greater must be loaded in a single magazine.

### High-precision paper transport technology

#### Examples of commonly used papers

#### Output print sizes

- 89×127mm(3.5"×5")
  - 102×152mm(4"×6")
  - 127×178mm(5"×7")
  - 165×216mm(6.5"×8.5")
  - 203×254mm(8"×10")
  - 279×356mm(11"×14")
  - 305×457mm(12"×18")
- \*max. exposure width 303.5mm(11.9")

\* Photo shows QD-21 PLUS with options.

### Easy operation touch screen

The system features a touch screen that is easy for anyone to use. Enlargement, reprints, and various kinds of image processing are only a touch of the finger away. Processing status can be checked in an instant.

### Supports professional digital cameras

The QD-21 Plus can easily print the large-volume data produced by professional digital cameras.

### Options

#### 120-size film scanner option

Supports sizes 6X4.5, 6X6, 6X7, 6X8, and 6X9. Quality is easily high enough for professional use. The QD-21 Plus comes with pre-installed color management software to assure a high level of color reproduction. For users with even more exacting needs, a high-quality drum scanner can be attached via the QD-STATION.

#### A3 flatbed scanner option allows input of large-format documents

Making print copies is as easy as placing the document or photo on the flatbed scanner. The magnification ratio can be freely selected up to A3 size. Make reprints even without the original negatives. The scanner installs conveniently on the upper surface of the main unit.

- ① Manual negative carriers
- ② 135/DX240 dual auto negative carrier
- ③ Slide mount carrier

# QD-21 PLUS

## De facto standard minilab for the 21st century

Supports input from 120-size film  
and a variety of paper sizes

The QD-21 Plus supports any and every type of digital print service. Connect the optional QD-STATION to dramatically expand the range of your service offerings. Image processing and CD-R write services are available through LAN connections to terminal PCs. With its outstanding operability, the QD-21 Plus takes your photo business into the realm of the printing business.

New

Large-format tray for easy retrieval of sizes  
beyond 152mm(6").

New sorter supports up to 8 orders.

One stocker holds up to 80 sheets of paper, paper width 152 mm(6") or less and transport width 254mm(10") or less.  
Supports up to maximum of 8 orders.

### Input from every type of media, with PC Card slot and floppy/CD-ROM drives standard

Input devices for the most commonly used media are built in, eliminating installation trouble. Printing from digital cameras and CD-ROM discs couldn't be simpler. The PCMCIA Card reader offers support for Compact Flash, SmartMedia, and Memory Stick media.

PC Card adaptors  
①Memory Stick  
②SmartMedia  
③Compact Flash

\*Media card and Memory Stick adapter are optional.

### Ultra-high-speed Pentium III processor standard

For smooth, speedy processing, the system features a 450MHz Pentium III processor with Intel's newest CPU architecture. Combined with the capacious system memory, this provides more than enough power for demanding digital print jobs.

### High speed & High quality built-in scanner supports slide film

The film scanner installed as standard equipment on the main unit boasts the high speed processing times, for speedy scanning of 35 mm negative film, slide film, and APS film.

New

### Image Processing Board with 256MB Memory

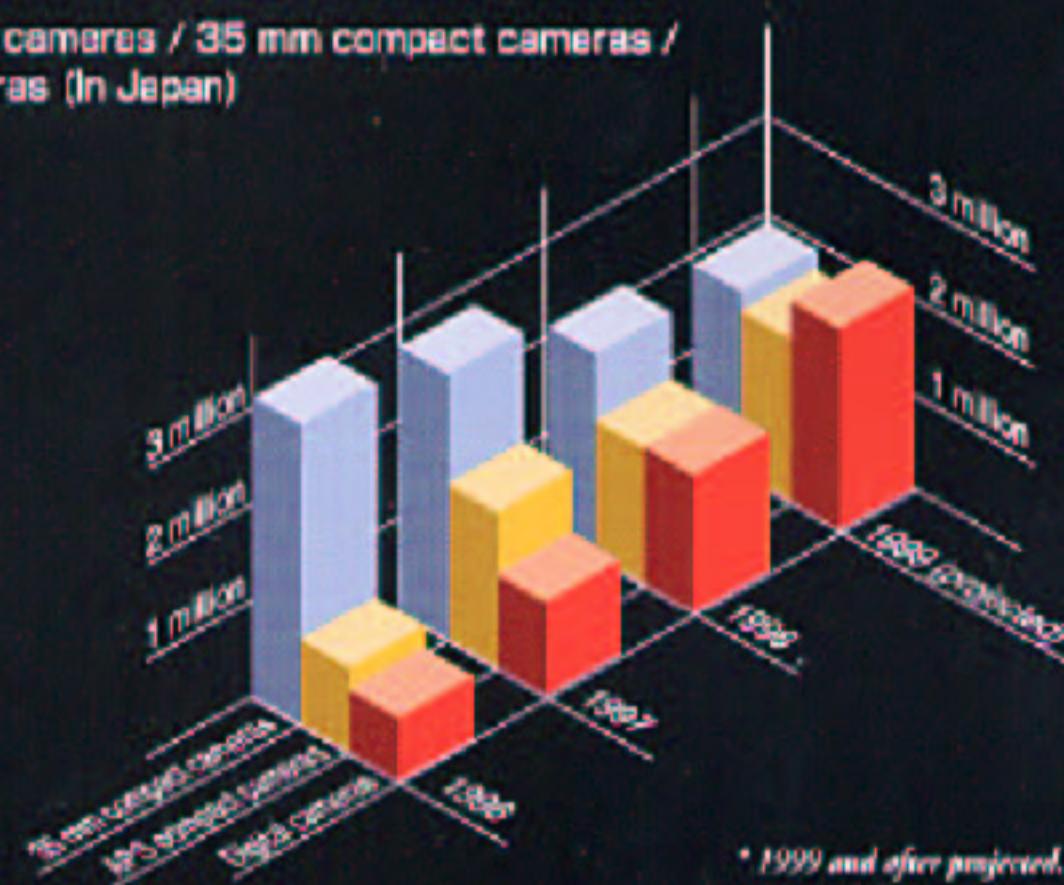

Increases the memory on the image processing board to 256MB. The entire board is replaced. 256MB of memory is more than enough for all everyday print service processing.

## Konica's proposal for completely new photo services

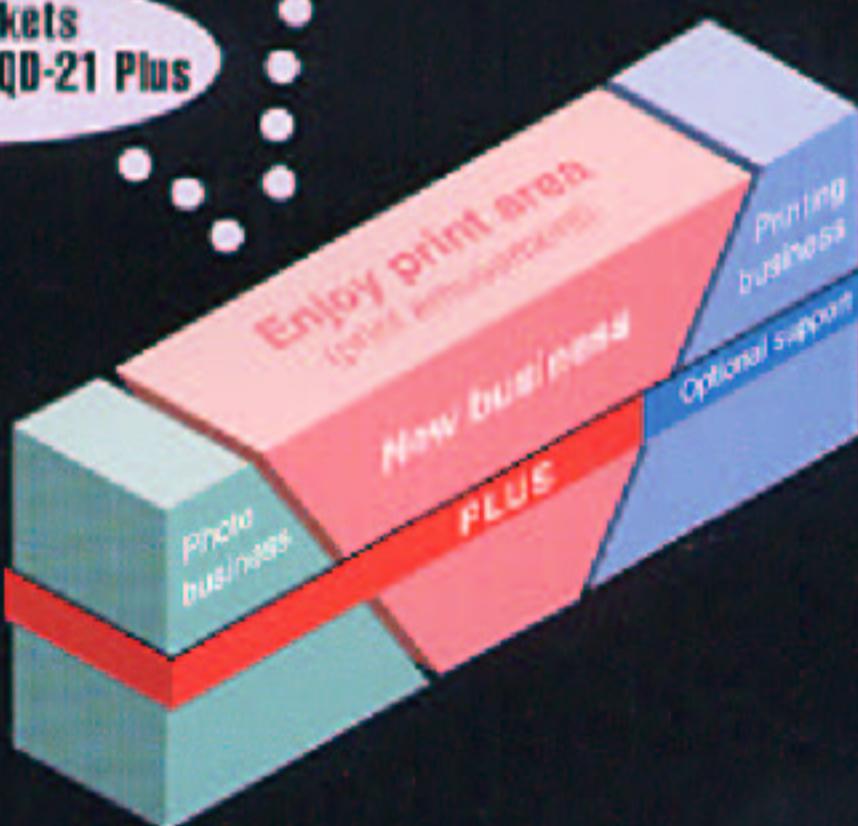

The QD-21 has evolved to meet the needs of the ever diversifying photo business. On a high level of quality, it enables services that have not been possible up to now, such as small-lot personal printing. The QD-21 Plus eliminates the border between the photo business and the printing business. With support for popular formats like Q-File prints and powerful network functions, it represents a remarkable step forward for the print business.

The QD-21 Plus – Removing the border between the photo business and the printing business

■Shipments of digital cameras / 35 mm compact cameras / APS compact cameras (In Japan)

New markets enabled by the QD-21 Plus

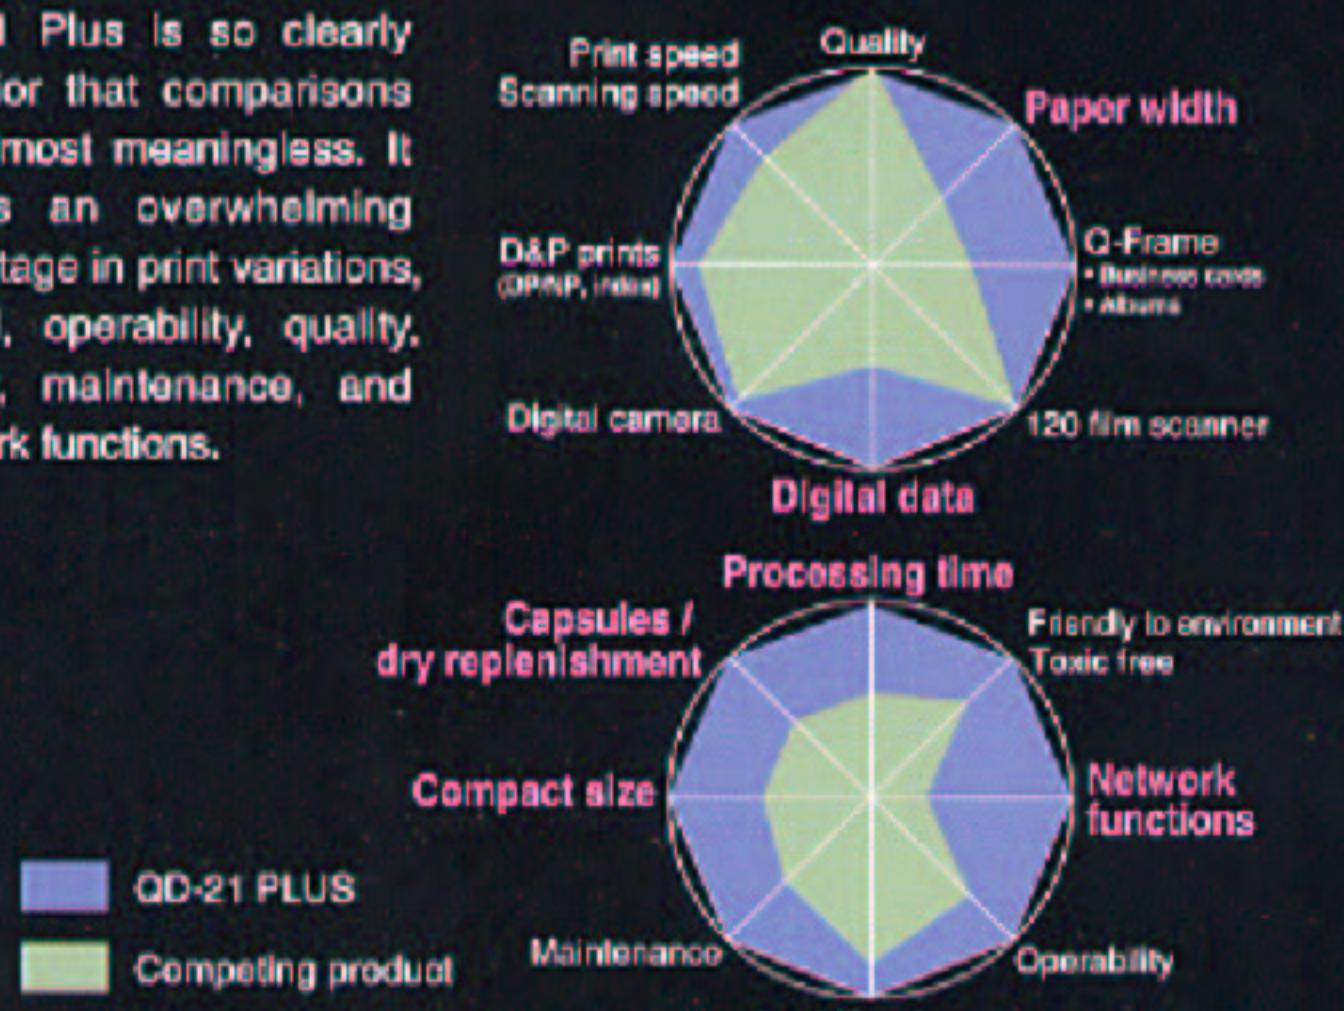

## Multi-shop deployment via networks and Internet

The QD-21 Plus features powerful network functions. LAN connections to a QD-STATION enable a wide assortment of new applications. Internet connections enable a global print business with a multi-shop configuration. Konica proposes a new kind of business to encompass the Internet and new media.

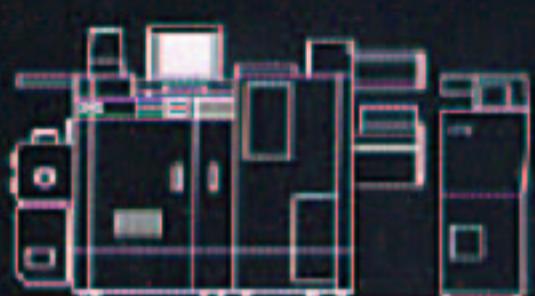

## The overwhelming superiority of the QD-21 Plus, clear at a glance

The performance of the QD-21 Plus is so clearly superior that comparisons are almost meaningless. It enjoys an overwhelming advantage in print variations, speed, operability, quality, safety, maintenance, and network functions.

## Compact footprint from digital design

The QD-21 Plus is an integrated system that includes a film scanner, flatbed scanner, PC Card slot, and floppy disk and CD-ROM drives. All of these functions are packed into a compact design that fits comfortably into a shop with as little as 150 square feet (13 square meters) of floor space.

# QD-21 Plus – The only choice 21st century technology from Konica to support the difficult digital print business

As digital cameras grow more popular, customers are demanding the ability to choose the size and design of their prints, along with the scene and number of prints. Shops that strive to give customers what they want are faced with longer hours of customer service and a host of other problems. Konica takes these problems seriously, and has found a solution – the QD-21 Plus full-digital minilab. Count on Konica to support the print shop of the 21st century.

# The QD-21 Plus – the only system worthy of the name full-digital minilab Software for enhanced functionality and image quality, eliminating worries about replacement

**The QD-21 Plus – new and improved,  
the de facto standard minilab for the 21st century**

The QD-21, trailblazer of the emerging digital age, continues its evolution. Moving far beyond the territory of conventional D&P prints, it ushers in the age of one-to-one service with functionality to meet any and all printing requirements. With the QD-21 Plus, your shop will be ahead of the competition and ready for the 21st century. Turn every type of print service into a new business opportunity. As customer requirements change, respond by simply upgrading the software. Long-term satisfaction is assured. The QD-21 Plus – truly the only choice. The crystallization of technology of technology for the 21st century, with an open road to future development through network support. Delivering higher image quality and more advanced functionality than ever before, the incomparable QD-21 Plus gives you an overwhelming advantage in the photo business of the future.

## ■ Input Media Supported by QD-21 Plus Main Unit

135 color film	Requires optional dual ANC
135 slide film (sleeve)	Requires optional dual ANC
135 slide film (mounted)	Requires optional mount carrier
IX240 color negatives	Requires optional dual ANC
IX240 color slides	Requires optional dual ANC
120 color film	Requires optional scanner
CD-ROM	●
Floppy disks	●
CompactFlash	Requires adapter
SmartMedia	Requires adapter
PC Card memory	●
Memory Stick	Requires adapter
MO discs	Requires MO drive
LAN data input	●

## ■ QD-21 Plus Functions
