

GEMINI

The newest professional image recorder
from Management Graphics

A Different Kind of Gem
A Different Kind of Solitaire

Images on chrome film are the best we've ever made. AND, images on negative film are so much better than our older recorders that the difference is apparent in side-by-side comparisons of 4x5 film from as much as ten feet away.

Negatives produced on GEMINI have a great dynamic range - black blacks and white whites. Fine black text on a white background really shows the difference.

Color purity is superior. A careful re-engineering of the entire optical path pays off with the snappiest prints ever made by an MGI film recorder negative.

GEMINI's high-contrast camera options include 35mm, 120/220, 4x5 and 8x10. Gemini supports resolutions up to 16k.

GEMINI is the latest member of a family of products that delivers reliable performance at prices that result in top value.

So, if you need film that is colorful, sharp and profitable - take a look at GEMINI.

"Gemini has the best sharpness
and contrast of any film
recorder in its price range
that we've seen yet."
