M300

The flexible M300 dry printer is a suitable fit for both low and high volume outlets

System configuration for high volume outlets

Multiple M300 printers can be connected to improve print efficiency

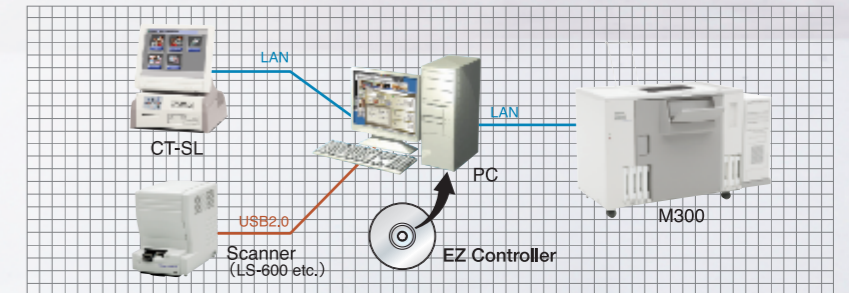

The ability to effectively use multiple printers to achieve maximum print efficiency is a sought-after feature for high volume minilab shops. With the M300, it is possible to install multiple printers and control them all with one PC. Installing EZ Controller software in the PC enables you to divide the print workload among multiple M300 printers and thereby provide a smooth and efficient print service.

System configuration for low volume outlets

A simple printing system formed by connecting a PC to a M300 printer

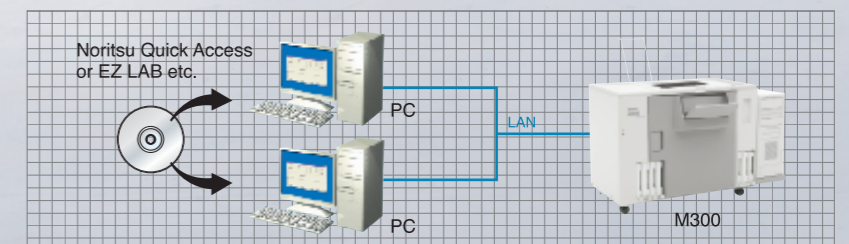

Since the M300 is a dry printing system that does not require chemicals, all you need to do is install EZ Controller software in the PC and you are ready to start making prints. The PC can be conveniently positioned in various places to suit your shop layout.

Stand-alone system configuration for photo and design studios

Easy professional-quality prints and enlargements of images sent from multiple client PCs

Installing NORITSU Quick Access software makes it easy to print images output from a single PC or even multiple PCs. This software provides a significant advantage, especially to places like photo/design studios where quality is a top priority.

Improved features to enhance user-friendliness from installation to input / output

Compact body

The M300 has a compact footprint of just 0.42 square meters, which is not only desirable for small-scale outlets, but also for expanding labs looking to free up floor space for additional printers.

High capacity

Despite its compact size, the M300 is a high capacity dry printer. Its combination of size, capacity and technology is sure to help you create new opportunities.

325 (W127×89mm) prints/hr
265 (W152×102mm) prints/hr

Simple USB 2.0 connection for scanner and CD-R writer

The interface for the scanner and the CD writer is USB 2.0. This versatile interface makes it easy to add new components to your existing network.

A wide variety of print sizes

The M300 produces a wide range of print sizes including 4"x6", 8"x10", 10"x12", and even 10"x36".

* Paper width: 203mm, 254mm only. Option required. The maximum paper advance length is 457mm when the paper width is 127mm, 152mm.

Two printers in the footprint of one

If the stacking configuration is used, two printers can be installed without taking up additional floor space. This enables you to set up an efficient space-saving network that is suitable for your output volume needs.

Easy and efficient EZ Controller

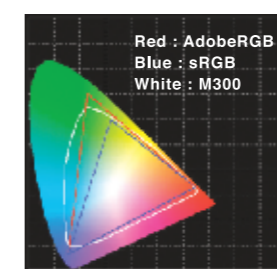

In addition to PJP with the easy-to-use GUI, the EZ Controller has many other convenient features. It also enables you to easily manage incoming orders, make value-added print settings, and correct images, etc.

"Easy Operation" Order Display

Excellent color portrayal with the 7-color ink system

The 7-color pigment ink system enables high quality prints with excellent color portrayal and natural gradations.

Supports both roll paper and sheet paper

With the M300, you can use both roll paper and sheet paper to fulfill a wide variety of customer needs. Maintenance for the paper and other items is easier than ever.
