Digital Package Cutter

SIENNA IMAGING™

Simply load the 10 - or 11-inch bar coded output from your digital printer (with bar code capabilities and a single hole punch) onto the Digital Package Cutter and press a key (or activate the optional foot switch). Its bar code reader will identify print sizes and placement on the paper. The Digital Package Cutter then automatically cuts and trims print sizes from sub-wallets up to 11 x 14s.

In addition to cutting most standard print sizes, the Digital Package Cutter can be programmed to cut paper into standard unit sheets rather than just individual prints— stopping at the end of a package or at the end of a specific order.

The Next Generation of Automation

Reduce labor costs with a Digital Package Cutter from Sienna. By cutting and trimming prints in one efficient step, lab workflows are streamlined for maximum productivity.

Sienna's Lab Systems Group set the standard by which all punch code package printers have been measured. By incorporating this technology and industry experience into a new generation of products, Sienna is able to offer a Digital Package Cutter developed with proven and tested package cutter technology.

- Patented design cuts both vertically and horizontally—resulting in individually cut and trimmed prints.
- Bar Code Technology allows for easy sorting and cutting.
- Simple software option allows user to switch between barcode and standard eight-hole binary punch code reading.
- Customized to fit your workflow requirements.

From senior portraits to wedding orders and special occasions, Sienna's Digital Package Cutter will reduce labor costs and increase your profitability.

STANDARD SIZES

- 8-Up Sub Wallets
- 8-Up Wallets
- 4-Up 3.5″ x 5″ (8.89cm x 12.70cm)
