- Length—23" (58cm)
- Width—15" (38cm)
- Height—22" (56cm)

SPECIFICATIONS

- Electrical: 120/220 VAC, 50/60 Hz.
(3 amperes @ 120 VAC)
- Pneumatic: 1 cfm at 80 p.s.i.

Source Two's Wide-Roll Film Splicer is an easy-to-use tabletop splicer designed for splicing long roll professional format films. This versatile splicer handles three film formats: 35mm, 46mm and 70mm. The splicer serves well as a PRE or POST splicer, and creates a conventional BUTT splice utilizing reliable one-inch wide heat seal splicing tape. The Wide-Roll is equipped with a built-in 70mm film trimmer for edge preparation, and comes equipped with a variable speed film take up mechanism.

Like other Source Two splicers, the Wide-Roll Splicer is microprocessor controlled for reliability, and features an active diagnostic system.
